

## **Tailored Job Description**

**Job Title:** Public Sector Data and Budget Analyst

### **Job Summary:**

We are seeking a results-driven professional with expertise in public finance, data analytics, and digital transformation. The ideal candidate will manage data-informed budgeting processes; streamline government reporting through technology, and lead evidence-based public finance initiatives.

### **Key Responsibilities:**

- Develop and implement digital tools to enhance budgeting and expense tracking.
- Lead performance-based budget planning and evaluation for public sector initiatives.
- Conduct predictive modeling and data analysis to inform policy and resource allocation.
- Collaborate with stakeholders to identify inefficiencies and optimize public development funding.
- Train and mentor finance staff on data-driven decision-making practices.

### **Qualifications:**

- Advanced knowledge of Python, Stata, Excel, and public finance principles.
- Proven record of successful digital reform implementation in government settings.
- Strong analytical and econometric skills.
- Excellent communication and leadership capabilities.
